EXPERIENCE

GENERAL ASSEMBLY, San Francisco

Full Stack Web Development | October 2016 - January 2017

Developed full stack applications during short 1 week sprints both on teams and individually. Learned to work and grow in a fast paced environment, always pushing to learn and improve.

PROJECTS:

Recipe Bots

- An app that allows you to import recipes from external URL's and generate meal plans all with just a few simple clicks.
- I personally created this site, all built from scratch in less than a week, I'm most proud of the scraper script I wrote that is ran to parse data to create a recipe.
- This site was built with JavaScript & Ruby on Rails. All styling was done using bootstrap and custom CSS. It uses Facebook and Google API's for easy authorization and analytics

Our Thoughts App

- Built an application with a team member that allows users to interact and receive data from other users via an API.
- Responsible for creating the backend and implementing in the Twilio API that would text users upon creation of thoughts.
- The Site was built in the MEN stack, using HTML, CSS, JavaScript, JQuery, Mongo DB, Node.js, Express.js, Bootstrap, Materialize and the Twilio

FLUENT HOME

Technician Manager | January 2015 - October 2016

Managed recruiting, hiring, and training throughout the United States. Tested and installed a wide range of smart home devices. Oversaw quality control and inventory management for the offices while insuring customers were informed, educated and pleased.
